

The Media Lab

MASSACHUSETTS INSTITUTE OF TECHNOLOGY
Tenure-Track Faculty Position in Technology and Learning
MIT Media Laboratory

The MIT Media Lab (www.media.mit.edu) is seeking candidates to fill a tenure-track faculty position in the area of technology and learning.

The Media Lab is an anti-disciplinary research organization focusing on the invention of new media technologies that radically improve the ways people live, learn, work, and play.

We are looking for faculty candidates who are committed to instigating dramatic changes in how, what, and where people learn – building on the Media Lab tradition of developing and studying new technologies to support playful, interest-driven, constructionist learning experiences for diverse communities of learners.

Candidates should have a record of original thinking, a willingness to take risks, a desire to look beyond traditional disciplines, and a dedication to making a difference in the world. Successful candidates will be expected to: establish and lead their own research group within the Media Lab; pursue creative work of the highest international standard; engage in collaborative projects with industrial sponsors and other Media Lab research groups; supervise masters and doctoral students; and participate in the Media Arts and Sciences academic program.

To apply, please fill out the application at <http://facultysearch.media.mit.edu/>
Application deadline: January 14, 2013

Appointments will be within the Media Arts and Sciences academic program, principally at the Assistant Professor level. A doctorate is preferred but not required.

The Media Laboratory is building a diverse community of scholars, and strongly encourages applications from women and members of under-represented groups.
